Contract/Closing

Construction

Initial Meeting

- RSH looks forward to setting up a meeting where we get to know each other and discuss your project scope.

Develop Budget

- After learning about your needs we develop a working construction budget for your project. Taking your must haves and wishes into consideration.

Site Evaluation

- RSH makes a site visit and helps develop an itemized estimate of site costs. We evaluate the best placement of your home on your lot.

Design Pre-Contract

- Our Design Pre-Contract commissions the production of your new home plans. This is where RSH and our clients become partners and pen to paper begins.

Final Construction costs

- Our team works with our designers to help develop, design and build specifications for your home. With design meetings we take a cost conscious approach to your design.

Contract/Closing

- Our team will provide you with a fixed-price total to build your new home. We will work with your lender to complete your construction loan closing.

Construction

- With our online management software you will be able to follow the construction of your new home step by step. With the App, you can stay connected anywhere.
